

IBM SurePOS 700 Series

Highlights

- Industry-standard, open platform maximizes application, peripheral and display choices, so you can create the best solution for your store
- Delivers advanced technology including powered USB, DVI video, PCI, DVD and NVRAM in a durable, retail-hardened design
- Supports the latest power and systems management options, including Wake on LAN®, Wired for Management and APM/ACPI

A new standard for POS performance

Designed for retailers who want to push the boundaries of point-of-sale (POS) technology, the IBM SurePOS™ 700 Series delivers the power and performance to drive e-business solutions today and tomorrow. Fast processing speed and high-bandwidth Ethernet support multichannel retailing, electronic marketing, CRM, multimedia, instant advertising and computerbased training. DMA hard drives minimize seek and write times. And powered USB technology enables hot-plugging, plug-and-play¹ setup and automatic configuration - all of which help simplify management and help reduce maintenance time.

Dynamic multimedia

The IBM SurePOS 700 Series includes the high-tech multimedia assets you need to captivate customers and generate revenue at the POS. Options include an integrated CD-ROM or DVD-ROM, and Digital Visual Interface (DVI) video, which allows you to run conventional and high-performance video now and add digital video solutions later.

Strong investment protection

An open platform runs applications for Microsoft® Windows® and IBM 4690 OS, so you can keep proven software. Choices for speed, slots, bays and peripherals let you configure the right solution today – then add capabilities when the time is right. System units and other components are retail-hardened for reliable performance.

Broad software offering

Select from a diverse number of POS applications developed by IBM, as well as StoreProven™ applications from IBM Business Partners. StoreProven software has been tested to work with the SurePOS 700 Series² – look for the StoreProven emblem to find the right one for your store.

High-powered POS solutions for retail e-business

IBM SureMark™ Printer for high-performance printing (optional)

10/100 Ethernet LAN (onboard) offers the speed and bandwidth to handle Internet and intranet applications

Powered USB provides fast data transfer, hot plugging, plug and play, color-coded connections and cleaner cabling, with no power brick

Wired for Management (WfM) compliance and Wake on LAN enable remote management of POS terminals

DVI-I video delivers fast refresh times and crisper, sharper graphics

IBM SurePoint™ Solution for GUI or touch-screen applications (optional)

Advanced Power Management (APM) and Advanced Configuration and Power Interface (ACPI) provide energy-efficient operation

AC switched convenience outlet for a single power cord

Battery backup powers the system unit after AC power loss so you can continue checkout without interruption (standard for 750; optional for 730)

Image depicts SurePOS 700 system in a typical retail setting.

ANPOS keyboard with pointing device eliminates the need for a separate mouse (optional)

Indicator light displays motherboard status at a glance

Direct Memory Access (DMA) hard drives for fast seek and write times

DVD-ROM or CD-ROM for multimedia applications (optional)

W Models 752/7P2	Narrow-format, thick-client solution optimized for Microsoft Windows 98/2000		
	 850 MHz Intel® Celeron™ processor³ 64 (752) or 128 MB (7P2) standard (up to 512 MB available⁵) 	 20 GB hard drive ⁴ optional (standard on 7P2) CD-ROM or DVD-ROM optional 	
Models 753/7P3	Wide-format, thick-client solution optimized for Microsoft Windows 98/2000		
	 850 MHz Intel Celeron processor³ 64 (753) or 128 MB (7P3) standard (up to 512 MB available⁵) 	 Two optional 20 GB hard drives⁴ (one standard on 7P3) CD-ROM or DVD-ROM optional

Services			

Support of USB hardware hot-plug and plug-and-play capabilities is OS and device dependent.

• 1 year, onsite service

Limited warranty⁸

Technical support

- ² IBM makes no warranties, express or implied, regarding StoreProven products and services, including any implied warranties of merchantability or fitness for a particular purpose. Statements made by IBM Business Partners that offer StoreProven applications are provided by the relevant third-party company and not IBM.
- 3 MHz/GHz only measures microprocessor internal clock speed; many factors affect application performance.

- 4 MB/GB/TB equals one million/billion/trillion bytes when referring to storage capacity; accessibility may be less.
- More than 512 MB available through special order. System has two PC-133 DIMM spekets

• 24x7 phone support (during warranty period⁹) and Web-based help

- Power Management functionality is device dependent.
- ⁷ Specific device support coming in 2002.
- 8 For a copy of the terms and conditions of IBM's statement of limited warranty, please contact your IBM representative or reseller.
- 9 Response times may vary.
